

Athlete Health & Performance Program – Minimum Standards for Practitioners

The minimum standards required for listing are developed by each professional group, in consultation with Sport PEI. Professions that are eligible to list members include those who have a specific sport medicine designation/qualification or those where a majority of their members work with athletes.

While Sport PEI does not endorse the individual practitioners listed, we work with the various professional associations on an ongoing basis to ensure that the individuals listed possess the required qualifications and that they are represented accurately.

Professions that have an official sport medicine designation, or that have a majority of their members working with athletes are eligible to list qualified practitioners. Only those practitioners who meet the minimum qualifications and standards as set out by their respective professional organizations may be listed in the Sport PEI Directory of Practitioners.

Minimum Standards for Practitioners

The following pages are minimum qualifications/standards for practitioners to be listed in the various professional categories:
